IS2104 - Rapid Application Development 2019

## Assignment 9

### Question A

Write a Java program to reverse a string (with several words).

### Question B

Write a Java program to count the letters, spaces, numbers and other characters of an input string.

### Question C

Write a Java program to convert a given string into lowercase.

### Question D

Write a Java program that accepts two integer values between 50 to 100 and returns true if there is a common digit in both numbers.

Write separate Java files for each and every question.

**\*\*Give viva to the Instructor after completing the task. Otherwise, marks will not be given.**
